

SAW Snow Climatology - March

KSAW - Mar (2001-2008)

Ceilings in Snow

Ceilings:

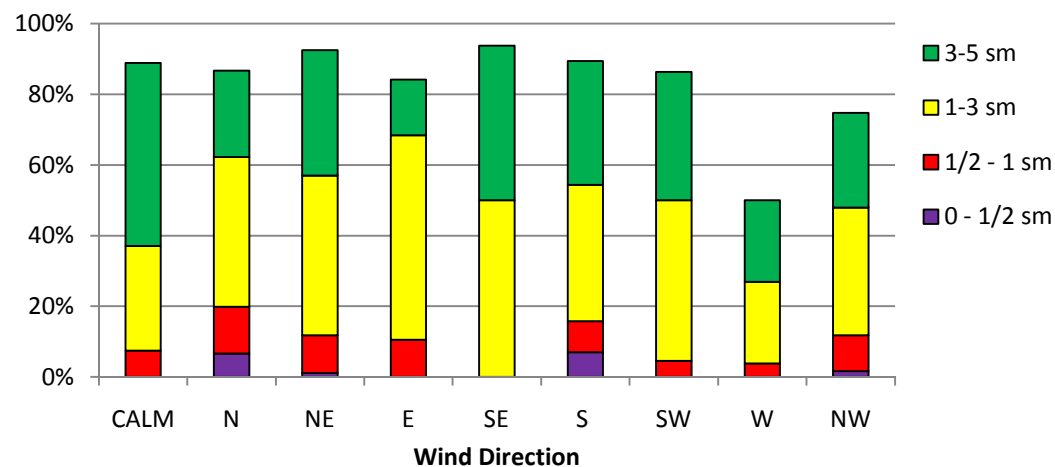

Majority of ceilings IFR (500 - 1000 ft) or low MVFR (1000 - 2000 ft).

Exception: Observations with W or NW winds mainly high MVFR (2000 - 3000 ft)

Highest percentage of VLIFR (0 - 200 ft) and LIFR (200 - 500 ft) ceilings occurred with NE and E winds.

KSAW- Mar (2001-2008)

Visibilities in Snow

Visibilities:

Majority of visibilities IFR (1 - 3 miles).

Exception: Observations with W winds mainly MVFR (3 - 5 miles).

Highest percentage of VLIFR (less than 1/2 mile) and LIFR (1/2 mile or 3/4 mile) visibilities occurred with N winds.

KSAW- Hourly Observations with Snow March (2001-2008)
